1. Claim 1 is objected to because of the following informalities: the term "assorted" is indefinite. Appropriate correction is required.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-3, and 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen et al. (6,020,546) in view of Nutting et al. (4,217,807).

Regarding claim 1, Cohen et al. disclose the claimed invention except a set of blocks having assorted volumes.

Nutting et al. teach a set of musical instrument having assorted volumes (Fig.1 shows assorted volumes by partial filling of water) for producing different tones (abstract). It would have been obvious to one having ordinary skill in the art to modify Cohen et al's instrument as taught by Nutting et al. to include a set of blocks having assorted volumes for the purpose of producing different tunes.

Regarding claims 2 and 3, Cohen et al. in view of Nutting et al. disclose the claimed invention. See above reasoning.

Regarding claims 5 and 6, Cohen et al. disclose the claimed invention (col. 2, lines 51-55).

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen et al. in view of Nutting et al. as applied to claim 1 above, and further in view of Simons et al. (6,091,009).

Regarding claim 4, Cohen et al. in view of Nutting et al. disclose the claimed invention including mounting means (col. 2, lines 5-10, Cohen et al.) except at least one of said clave block having a mounting ring.

Simon et al. teach a percussion instrument having a mounting ring (70) providing as a handle. It would have been obvious to one having ordinary skill in the art to modify Cohen et al. in view of Nutting et al's instrument as taught by Simon et al. to include at least one of said clave block having a mounting ring for the purpose of providing a handle.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-yung Hsieh whose telephone number is 571-272-2065. The examiner can normally be reached on 7:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on 571-272-2107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
